

# VISIOTEST

Display unit for VOH Forcetest  
and Atlas Copco Microtorque torque sensors

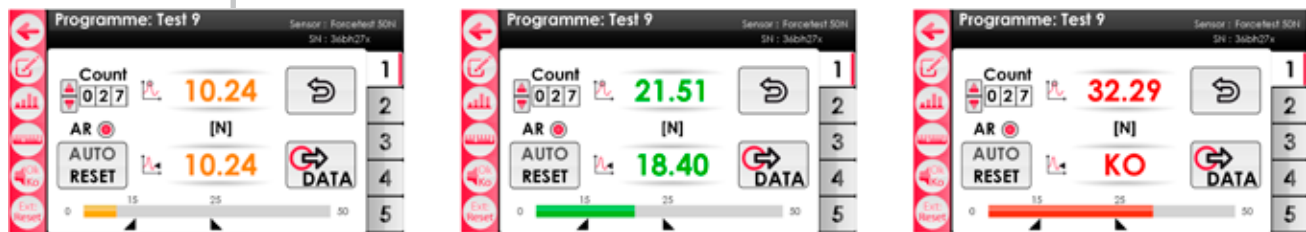

## Benefits:

- Compatible with FORCETEST force sensors and Atlas Copco Microtorque torque sensors
- Automatic detection of connected sensors
- Creation, editing and management of programs affiliated with the sensors
- Transfer of programs from one Visiotest to another via SD card
- Up to 999 sensors, 999 programs per sensor, 5 tolerances per program
- Possible creation of working sequences
- Visual and audio signalling of the state and result of measurements
- Two working modes: control and production
- Compatible with Custom Q3 (VOH 17.01781) and SPC Tesa (VOH 17.00368) ticket printers
- Data transfer via USB cable
- Integral statistical treatment module
