

VOH SCREWDRIVERS

High quality VOH watchmaking screwdrivers

An indispensable tool on every workbench, the VOH screwdriver is of guaranteed professional quality. A knurled stainless steel handle provides a good grip. A hexagonal head in anodized aluminium mounted on a ball pivot allows for smooth rotation and precision work. Available in 16 different diameters, these screwdrivers are supplied with a high quality steel blade, ground in a «V». The diameters are engraved by laser on the screwdriver handles and each head colour corresponds to a specific size.

In addition to hardened steel, the blades are available in CUBE (alloy of copper and beryllium) cut in a «V» as well as in HSS steel with parallel grinding.
